Work Experience

Product Manager, Repute
HRIS Ecosystem | Bangalore, IN | Dec 2021 - Present

- Built an embedded integrations marketplace 0-to-1 inside HRIS platforms (GreytHR, AdrenalinMAX, GelyxHR, PocketHRMS), with total coverage of around 35,000 employers across India and the Middle East.
- Increased marketplace-sourced deals to 45% of solution providers' monthly closures in 6 months by building an ecosystem-led sales flow for listed integrations and a developers' platform that enables partner integrations to self-list across HRtech, Tax, ERP, , Finance Systems, Accounting, Benefits, and ITSM.
- Boosted recruitment & payroll module activation and usage by 5X in 3 months and grew MAU from 10,000 to 25,000 and ARR by 4X in 18 months by executing Zapier-like workflow automations inside HRIS.
- Grew the integration catalog from 75 to 175+ by replacing bespoke per-integration builds with a unified API layer on a canonical data model and giving each new integration a repeatable reference architecture instead of a custom build.
- Grew HRIS ARR by 2X by shipping a live 4-agent AI assistant for end-to-end recruitment, payroll checks, onboarding, and compliance; defined the orchestration layer with the CTO, grounded answers in live HRIS data, and set accuracy benchmarks with human review.
- Joined as a Founding Product Manager. Owned discovery, specs, and scope prioritization, QA, and release sign-off. Used Claude Code and other AI tools to prototype and ship small frontend changes.
- Reduced statutory filing effort for HR teams from multiple days/weeks to just 10 minutes by building compliance workflows that push accurate payroll data downstream into government and financial systems from HRIS payroll modules, eliminating manual reconciliation, data preparation, and portal uploads for tax remittance.

Marketing Manager, Moolya
QA Solutions | Bangalore, IN | Dec 2019 - April 2021

- Established Moolya as a leader in the QA solutions market by growing a QA Engineers' community from 0 to 16,000 members across the globe by introducing a QA advocacy program, monthly newsletters, and online hackathons.

Program Manager - CX, Nestaway
Co-live and House Rentals | Bangalore, IN | Oct 2016 - Dec 2019

- Reduced user tickets by 10% and social media escalations by 50% within 3 months by gathering data from support tickets and analyzing them to understand recurring escalation patterns and redesigning the tenant journeys end to end.
- Improved overall company NPS by 70% and converted 10% of detractors to promoters by running user interviews and targeted experiments and launching a rent rewards program that also improved on-time rental payments.
- Saved INR 1,800 per user per month by migrating the customer experience team from an external CRM to an internal tool. Gathered requirements, wrote the PRD, drove deployment with Tech and Product, and designed the training program for around 150 team members.

Skills

Product: User research & discovery, 0-to-1 builds, stakeholder management, async and cross-functional collaboration, UX/UI, GTM, user-led product building, A/B testing, engineering-led product building.
Domain: HRMS, HRIS, Payroll, Unified API, Platform Integrations, HR Automations, Accounting sync, ERP integrations, HRtech, iPaaS, SaaS
Technical: API design, schema design and mapping, SQL, CTE, SDLC, data modelling, AI coding
AI: LLM, RAG, Eval design, AI prototyping, Agent orchestration, Agentic AI
Tools: Claude Code, Jira, Metabase, MySQL, Figma, Google Analytics

Education

Bachelor of Engineering, Mechanical Engineering | Annamalai University | 2011 - 2015 | 8.7/10 CGPA
